

BOARD OF HEALTH

TOWN OF HEATH
Massachusetts

**HEATH BOARD OF HEALTH
PERC SEASON REGULATION**

Effective January 1st, 2014, the Heath Board of Health will allow percolation tests to be conducted at any time of year provided that conditions of 310 CMR 15.104 are met. The soil to be tested must be below the frozen layer.

Systems serving new construction shall be prohibited in areas with percolation rates slower than 60 minutes per inch. Approval of a soil absorption system in soils with a percolation rate between 60 and 90 minutes per inch may only be granted for upgrades of existing systems with no increase in design flow. These regulations conform to the provisions of 310 CMR 15.245.

Approved on December 18, 2013
